4. Introduction

4.1 Business Goals

The primary business goals of the CRM Enhancement Project are to improve customer relationship management, optimize sales operations, and increase business productivity through automation and data-driven decision-making.

- Improve customer acquisition through efficient lead management.
- Enhance customer engagement by providing a 360-degree customer view.
- Increase sales conversion by streamlining the lead-to-opportunity process.
- Improve customer retention through proactive follow-ups and personalized interactions.
- Standardize business processes across Sales, Marketing, and Customer Support teams.
- Increase operational efficiency by automating repetitive business activities.
- Improve decision-making through real-time dashboards and business analytics.
- Strengthen data quality by eliminating duplicate records and maintaining a centralized customer repository.
- Enhance collaboration among business teams through a unified CRM platform.
- Build a scalable CRM solution that supports future business growth and additional integrations.

4.2 Business Objectives

Sales Objectives

- Reduce lead response time from 24 hours to less than 2 hours.
- Increase lead conversion rate by at least 20%.
- Reduce the average sales cycle by 25%.
- Improve sales forecast accuracy to over 90%.
- Increase sales team productivity by automating manual activities.

Customer Management Objectives

- Provide a complete 360° customer profile containing all interactions, activities, opportunities, and support history.
- Reduce duplicate customer records by at least 95%.
- Improve customer satisfaction by enabling faster issue resolution and better communication.

Operational Objectives

- Automate lead assignment using configurable business rules.
- Automate follow-up reminders, task creation, and notification workflows.
- Reduce manual data entry through third-party integrations and automated data capture.
- Improve cross-functional collaboration between Sales, Marketing, and Customer Support teams.

Reporting Objectives

- Provide real-time dashboards for executives, managers, and operational users.
- Enable users to generate customizable reports with filtering and export capabilities.
- Deliver actionable insights into sales performance, pipeline health, marketing effectiveness, and customer support metrics.

Security & Compliance Objectives

- Implement role-based access control (RBAC) to secure customer data.
- Maintain a complete audit trail for all critical business transactions.
- Ensure secure storage and transmission of customer information in compliance with organizational security standards.

Scalability Objectives

- Support increasing business volume without significant performance degradation.
- Enable easy integration with Email, Calendar, ERP, Marketing Automation, Payment Gateway, and other enterprise applications.
- Provide a configurable CRM platform capable of supporting future business requirements without major redevelopment.

Success Metrics Traceability

Business Objective	Metric	Target	Source
Reduce lead response time	Avg. time from Lead creation to first contact	< 2 hours	Lead Performance Report
Increase lead conversion rate	Leads Converted / Leads Created	+20%	Lead Performance Report
Reduce duplicate customer records	Duplicate records detected at merge / total records	-95%	Admin data-quality dashboard
Improve sales forecast accuracy	Forecast Revenue vs. Actual Closed Revenue variance	< 10% variance	Revenue Forecast Report
Reduce average sales cycle	Days from Lead creation to Opportunity Closed-Won	-25%	Sales Pipeline Report

4.3 Business Rules

Rule ID	Business Rule	Description
BR-001	Unique Lead	Email ID and Mobile Number combination should be unique for every lead.
BR-002	Mandatory Fields	First Name, Last Name, Email/Mobile, Lead Source and Owner are mandatory while creating a lead.
BR-003	Lead Assignment	Every newly created lead must be assigned to a Sales Executive either manually or automatically.
BR-004	Lead Status	Lead status must follow the predefined workflow (New -> Contacted -> Qualified -> Opportunity -> Won/Lost).
BR-005	Lead Conversion	Only Qualified leads can be converted into Contacts and Opportunities.
BR-006	Opportunity Creation	Opportunity cannot exist without an associated Contact.
BR-007	Activity Completion	Follow-up tasks must be completed before the due date or automatically marked as Overdue.
BR-008	Quote Approval	Discounts greater than 15% require Sales Manager approval.
BR-009	Customer Merge	Duplicate customer records can only be merged by CRM Administrator.
BR-010	Ticket Closure	Customer support tickets cannot be closed without selecting a resolution code.
BR-011	Audit Trail	Every Create, Update and Delete operation must be recorded in Audit Logs.
BR-012	User Access	Users can access only records permitted by their assigned role.
BR-013	Opportunity Closure	Opportunity must contain Expected Revenue before marking as Won.
BR-014	Inactive Leads	Leads inactive for 30 days shall be automatically reassigned to the Sales Manager.
BR-015	Customer Deletion	Customer records cannot be permanently deleted; they can only be marked as Inactive.

4.4 Background

Chiranjeev Gurukul uses a legacy Customer Relationship Management (CRM) application used by the Sales, Marketing, and Customer Support teams to manage customer interactions, sales opportunities, and business operations. While the current system supports basic CRM functionalities, the growing customer base and evolving business requirements have exposed several operational limitations.

The existing CRM relies on manual processes for lead assignment, follow-up management, and customer communication, resulting in delayed responses, inconsistent sales processes, duplicate customer records, and limited visibility into the sales pipeline. Reporting capabilities are limited, making it difficult for management to monitor business performance and make informed decisions.

To address these challenges, the organization intends to enhance the CRM by introducing advanced lead management, workflow automation, opportunity tracking, customer lifecycle management, integrated communication channels,

customizable dashboards, and comprehensive reporting. The enhanced CRM will provide a centralized platform that improves collaboration across departments, increases employee productivity, enhances customer experience, and supports future business growth through scalable and configurable solutions.

4.5 Project Objective

The primary objective of the CG's CRM Enhancement Project is to improve business efficiency by optimizing customer relationship management processes and providing users with a modern, scalable, and intelligent CRM platform. The project objectives are as follows:

- Enhance lead management by enabling automated lead capture, qualification, assignment, and tracking.
- Provide a comprehensive 360-degree customer view by consolidating customer profiles, communication history, activities, opportunities, and support interactions.
- Improve sales effectiveness through opportunity management, configurable sales pipelines, quotation management, and sales forecasting.
- Automate repetitive business processes such as lead assignment, follow-up reminders, notifications, approvals, and workflow execution.
- Improve customer engagement by integrating communication channels such as Email, WhatsApp, SMS, and Calendar into a single platform.
- Enable Marketing teams to execute targeted campaigns, customer segmentation, and lead nurturing activities.
- Strengthen Customer Support operations through ticket management, SLA monitoring, and issue escalation workflows.
- Deliver real-time dashboards and configurable reports to support operational monitoring and strategic decision-making.
- Improve data quality by implementing duplicate detection, validation rules, and standardized customer information management.
- Enhance system security through role-based access control, audit logging, and secure authentication mechanisms.
- Enable seamless integration with external applications such as ERP systems, Email services, Calendar applications, Marketing platforms, and third-party APIs.
- Build a scalable and configurable CRM platform capable of supporting future business expansion and evolving organizational requirements.

4.6 Project Scope

4.6.1 In Scope Functionality

Sales Users:

- Login, Dashboard, Lead Capture, Lead Qualification, Lead Assignment, Lead Scoring
- Contact Management, Opportunity Management, Pipeline View, Calendar
- Follow-up Tasks, Email Integration, Call Logs, Meeting Scheduling
- Quote Generation, Customer Timeline

Marketing Users:

- Campaign Management, Email Campaigns, Customer Segmentation
- Landing Pages, Lead Nurturing, Marketing Reports

Customer Support:

- Ticket Creation, Ticket Assignment, SLA Tracking, Escalation, Customer History

Admin:

- User Management, Role Management, Workflow Configuration, Approval Rules
- Product Management, Dashboard Management, Reports, API Configuration, Audit Logs, Security

4.6.2 Out of Scope Functionality

- ERP
- Payroll

- HRMS
- Accounting
- Inventory Management
- Manufacturing
- Procurement

4.7 User Roles

Role	Description
Visitors	Submit enquiry or lead capture forms; browse public information; contact sales; subscribe to marketing communications; schedule a demo. Cannot access CRM data or customer information.
Sales Executive	Login, view personalized dashboard, create/edit/manage leads, qualify leads, convert to contacts and opportunities, manage customer profiles, schedule calls/meetings/follow-ups, log interactions, generate quotations, update pipeline stages, view own reports.
Sales Manager	View team dashboard and pipeline, assign leads, monitor team KPIs, approve discounts/quotations, review forecasts, reassign opportunities, configure territories, access org-wide sales reports.
Marketing Executive	Create/manage campaigns, design email campaigns and journeys, manage landing pages and lead capture forms, segment customers, execute nurturing, track ROI, import/export lists.
Customer Support Executive	Create/manage tickets, assign and update status, view customer history, escalate cases, track SLA compliance, add notes, close tickets with resolution codes.
CRM Administrator	Manage users/roles/permissions, configure workflows/approvals, manage fields/forms/layouts, configure dashboards/reports, maintain master data, manage integrations, monitor audit logs, manage security.
Business Owner / Executive Management	View executive dashboards, monitor revenue/pipeline/acquisition metrics, review KPIs and forecasts, monitor retention/churn, approve strategic decisions.
System Integration User (API / External Systems)	Exchange lead/contact/opportunity data with external systems, synchronize with ERP/Accounting/Marketing/Payment systems, process API/webhook requests, maintain integration logs.

5. Assumptions

- Existing CRM database is available.
- Users have valid login credentials.
- Email server integration is available.
- WhatsApp API is available.
- Existing customer data can be migrated.

6. Constraints

- Budget
- Timeline
- Third-party API limitations
- Legacy database compatibility
- Existing UI framework

7. Risks

7.1 Technological Risks

- Data migration issues from the legacy CG database - schema mismatches or data-quality problems surfacing only after cut-over.
- Integration failures with third-party APIs (Email, WhatsApp, ERP, Payment Gateway).
- Performance degradation under concurrent load approaching the 500-user NFR-001 target.
- Legacy database compatibility constraints limiting the new feature set.

7.2 Skills Risks

- Limited internal familiarity with configurable-workflow/approval-engine concepts, slowing Admin module configuration.
- Dependence on a small number of individuals for AI Assistant design and tuning, with no documented handover plan.

7.3 Political Risks

- Resistance from Sales/Marketing/Support leads to standardized workflows that reduce local process flexibility.
- Competing priorities across Sales, Marketing, and Support stakeholders for phase-1 feature inclusion.

7.4 Business Risks

- Low user adoption if the new CRM is perceived as adding steps rather than saving time.
- Scope creep from stakeholders requesting features outside the agreed In-Scope list.
- Duplicate customer data persisting post-migration if de-duplication rules are not enforced retroactively.
- Revenue/forecast disruption during phased cut-over if Sales Managers lose pipeline visibility mid-migration.

7.5 Requirements Risks

- Incomplete requirements at BRD sign-off leading to rework during development.
- Ambiguous acceptance criteria for the AI Assistant, risking scope disputes at UAT.

7.6 Other Risks

- Regulatory exposure if customer PII handling does not align with applicable Indian data-protection requirements.
- Vendor/API pricing changes (Email, WhatsApp Business API) affecting the integration cost baseline.

7.7 Issues

- Approval of new workflows
- API dependencies
- Existing data quality
- Resource availability

8. Business Process Overview

The Chiranjeev Gurukul CRM system is designed to streamline and automate the organization's customer relationship management activities, enabling efficient collaboration between Sales, Marketing, Customer Support, and Management teams. The CRM manages the complete customer lifecycle, beginning with lead generation and continuing through lead qualification, opportunity management, sales closure, customer onboarding, post-sales support, and customer retention.

High-level flow: Lead Created -> Sales Executive Receives Lead -> Assignment -> Customer Contact -> Follow-up -> Opportunity -> Quotation -> Deal Won/Lost -> Customer Support.

Detailed process:

- Prospective customers submit enquiries through the website, landing pages, social/email campaigns, referrals, or manual lead entry.
- The CRM captures and validates the lead information while preventing duplicate records.
- New leads are automatically or manually assigned to the appropriate Sales Executive based on predefined assignment rules.
- Sales Executives contact the prospective customer, record communication history, schedule follow-up activities, and update lead status.
- Qualified leads are converted into Customer Contacts and Sales Opportunities.
- Sales Executives manage opportunities through configurable pipeline stages, recording expected revenue, probability, quotations, and customer interactions.
- Sales Managers monitor pipeline progress, approve quotations/discounts where required, review forecasts, and track team performance.
- Marketing teams execute campaigns, segment customers, nurture leads, and analyze campaign effectiveness.
- Customer Support Executives manage service requests, track SLA compliance, escalate unresolved cases, and record resolutions.
- Business users generate operational and analytical reports across lead conversion, sales performance, engagement, and support metrics.
- CRM Administrators manage users, roles, permissions, workflows, integrations, dashboards, reports, and overall configuration.
- Executive Management reviews real-time dashboards and BI reports to support strategic decision-making.

8.1 Legacy System (AS-IS)

- Leads arrive from multiple channels with no automated capture or duplicate check at intake.
- Lead assignment to a Sales Executive is a manual step, creating delay and inconsistent distribution.
- Customer communication history is fragmented across individual inboxes and excel sheets rather than centralized against the customer record.
- Follow-ups depend on individual Sales Executive discipline - no system-driven reminders or overdue tracking.
- Duplicate customer records accumulate because there is no enforced unique-identity rule at creation.
- Reporting is limited and largely manual, giving delayed or partial visibility into pipeline and performance.
- Support requests are handled without SLA tracking or a formal escalation path.
- Marketing activities run largely outside the CRM, disconnected from lead and customer data.

8.2 Proposed Recommendations (TO-BE)

AS-IS Pain Point	TO-BE Recommendation
Manual lead assignment	Automated, rule-based Lead Assignment (BR-003) with configurable routing by territory/source
Fragmented communication history	Centralized Customer Timeline (FR-015) giving a 360-degree view across calls, emails, meetings, quotes, and tickets
No follow-up discipline	Workflow Automation for reminders, task creation, and overdue tracking (FR-006, BR-007)
Duplicate customer records	Enforced uniqueness at lead creation (BR-001) plus Admin-controlled merge process (BR-009)

AS-IS Pain Point	TO-BE Recommendation
Limited, manual reporting	Configurable real-time dashboards and standard reports (Section 9.4) with export to Excel/PDF/CSV
No SLA tracking on Support	SLA Tracking & Escalation (FR-024) with breach alerts
Marketing disconnected from CRM data	Native Campaign Management, Segmentation, and Lead Nurturing inside the CRM (FR-016 to FR-020), feeding Lead Score directly

9. Business Requirements

9.1 Requirement Prioritization

Value	Rating	Description
1	Critical	Most urgent and most important requirements.
2	High	Urgent but not as critical requirements and important requirements.
3	Medium	Important but not urgent requirements.
4	Low	Low importance and not urgent requirements.
5	Future	Future scope requirements.

9.2 Functional Requirements

Req#	Pri	Requirement	Description	Stakeholder(s)
FR-001	1	Login	User will log in with email and password, with a reset-password option and Google account login.	All users
FR-002	1	Dashboard	System shall display a personalized dashboard based on user role.	All users
FR-003	1	Lead Management	User shall create, edit, assign and qualify leads.	Sales
FR-004	1	Contact Management	User shall maintain a customer/contact profile with complete interaction history drawn from the Customer Timeline (FR-015).	Sales
FR-005	1	Opportunity Management	User shall create opportunities linked to a Contact (BR-006) and move them through configurable pipeline stages, recording Expected Revenue and Probability.	Sales
FR-006	2	Workflow Automation	Automatic reminders, notifications and task creation.	Sales
FR-007	2	Email Integration	Send and receive emails from the CRM.	Sales
FR-008	2	Reports	Generate configurable dashboards and reports.	Managers
FR-009	2	Ticket Management	Customer support ticket lifecycle.	Support
FR-010	3	AI Assistant	System shall surface next-best-action suggestions and lead-prioritization recommendations based on Lead Score and activity recency. Model, training data, and explainability requirements to be defined in a separate AI design addendum.	Sales
FR-011	1	Quote & Proposal Generation	User shall generate quotations from an Opportunity using a Product/Price list, apply discounts (subject to BR-008), and export as PDF or send by email.	Sales, Sales Manager
FR-012	2	Calendar	User shall view a unified calendar of meetings, calls, and follow-up tasks, with two-way sync to Google/Outlook calendar.	Sales, Marketing, Support
FR-013	2	Call Logs	User shall log calls against a Lead, Contact, or Opportunity, capturing duration, outcome, and notes; click-to-call is a Future-scope item.	Sales
FR-014	2	Meeting Scheduling	User shall schedule meetings, send calendar invites, and record outcomes against the related record.	Sales
FR-015	2	Customer Timeline	System shall present a chronological, filterable timeline of all activities, emails, calls, quotes, and tickets for a customer.	Sales, Sales Manager, Support
FR-016	2	Campaign Management	User shall create, schedule, and track campaigns across channels (Email, SMS, WhatsApp) with a defined lifecycle (Draft to Active to Completed).	Marketing
FR-017	2	Email Campaigns	User shall design and send templated email campaigns to segmented lists and view open/click/bounce metrics.	Marketing
FR-018	3	Customer Segmentation	User shall build customer segments using demographic, behavioral, and engagement filters.	Marketing
FR-019	3	Landing Pages	User shall create and publish landing pages with embedded lead-capture forms feeding into Lead Capture (BR-001, BR-002).	Marketing
FR-020	3	Lead Nurturing	System shall support multi-step, trigger-based nurture sequences that update Lead Score and Status automatically.	Marketing

Req#	Pri	Requirement	Description	Stakeholder(s)
FR-021	3	Marketing Reports	User shall generate campaign ROI, conversion, and engagement reports filterable by campaign, channel, and date.	Marketing, Management
FR-022	1	Ticket Creation & Categorization	User shall create a support ticket linked to a Customer, with Category and Priority, from Email, Web Form, or manual entry.	Support
FR-023	1	Ticket Assignment	System shall auto-assign tickets by category/priority rules, or allow manual reassignment by a Support Lead.	Support
FR-024	1	SLA Tracking & Escalation	System shall track SLA timers per ticket Priority and auto-escalate/notify on breach.	Support, Support Lead
FR-025	2	Ticket Closure Control	System shall block ticket closure unless a Resolution Code is selected (BR-010).	Support
FR-026	1	User & Role Management	Admin shall create/deactivate users, assign roles, and define role-based field/record permissions (BR-012, NFR-004).	CRM Admin
FR-027	2	Workflow & Approval Configuration	Admin shall configure automation rules and multi-step approval chains without code changes (e.g., BR-008).	CRM Admin
FR-028	3	Product/Price List Management	Admin shall maintain the product catalog and pricing used by Quote Generation (FR-011).	CRM Admin
FR-029	2	Dashboard & Report Configuration	Admin shall create and assign role-specific dashboards/reports and control view/export access.	CRM Admin
FR-030	1	API & Integration Configuration	Admin shall configure and monitor API keys/webhooks for Email, WhatsApp, ERP, and Payment Gateway, with error logging.	CRM Admin
FR-031	1	Audit Log Management	System shall log every Create/Update/Delete with user, timestamp, and before/after values (BR-011); Admin can search/export logs.	CRM Admin

9.3 Non-Functional Requirements

ID	Requirement
NFR-001	Scalability: System shall support 500 concurrent users.
NFR-002	Speed: Dashboard shall load within 3 seconds.
NFR-003	Reliability: CRM availability shall be 99.9%.
NFR-004	Role-Based Access Control (RBAC).
NFR-005	Audit logs for every transaction.
NFR-006	Data encryption at rest and in transit.
NFR-007	Daily backup and disaster recovery.
NFR-008	Responsive UI for desktop, tablet and mobile devices.
NFR-009	Authentication: Support SSO/OAuth (Google) and enforce password complexity plus account lockout after failed attempts.
NFR-010	Session security: Auto-logout after a configurable idle period; session tokens invalidated on password change.
NFR-011	Data privacy & compliance: PII handling shall comply with applicable Indian data-protection law (Digital Personal Data Protection Act) - consent capture, access, and deletion-on-request workflows.
NFR-012	Data retention: Define retention periods for closed leads, resolved tickets, and audit logs before archival/purge, consistent with BR-015.
NFR-013	Integration resilience: Third-party API failures shall be logged, retried with backoff, and surfaced to CRM Admin (FR-030).
NFR-014	Localization: UI and communication templates shall support English and at least one regional language.
NFR-015	Browser/device support: Supported browsers (last 2 versions of Chrome, Edge, Safari) and minimum mobile OS versions.
NFR-016	Disaster recovery targets: Explicit RPO and RTO in addition to the daily-backup requirement (NFR-007).

9.4 Report Specifications

Report	Fields	Visible To	Schedule / Delivery
1. Lead Performance Report	Lead Source, Lead Count, Qualified, Converted, Lost, Conversion % Filters: Date, Owner, Source Export: Excel, PDF, CSV	Sales Executive (own), Sales Manager, Management (all)	On-demand + weekly email
2. Sales Pipeline Report	Opportunity, Stage, Revenue, Probability, Owner	Sales Manager, Management	Real-time dashboard + export
3. Sales Executive Performance	Executive Name, Leads Assigned, Opportunities, Won Deals, Revenue	Sales Manager, Management (exec sees own only)	Weekly
4. Customer Activity Report	Customer, Calls, Meetings, Emails, Last Activity	Sales Executive (own), Sales Manager	On-demand
5. Support Ticket Report	Ticket Number, Customer, Status, SLA, Resolution Time	Support Executive (own), Support Lead (all)	Daily
6. Revenue Forecast Report	Month, Pipeline Value, Expected Revenue, Closed Revenue	Sales Manager, Management	Monthly
7. Marketing Campaign Report	Campaign, Leads Generated, Cost, ROI, Conversion Rate	Marketing Executive, Management	Per-campaign + monthly rollup

9.5 Data Dictionary

Lead

Field	Type	Length	Mandatory	Description
LeadID	Auto Number	20	Yes	Unique Lead Identifier
FirstName	Text	100	Yes	Customer First Name
LastName	Text	100	Yes	Customer Last Name
Email	Email	255	Yes	Customer Email
Mobile	Number	15	Yes	Customer Mobile
Company	Text	150	No	Organization Name
LeadSource	Dropdown	50	Yes	Source of Lead
LeadStatus	Dropdown	30	Yes	Current Status
LeadScore	Number	3	No	AI Lead Score
Owner	User Lookup	-	Yes	Assigned Sales Executive
CreatedDate	DateTime	-	Auto	Creation Timestamp

Contact

Field	Type	Mandatory	Description
ContactID	Auto Number	Yes	Unique Contact
CustomerName	Text	Yes	Customer Name
Email	Email	Yes	Email Address
Mobile	Number	Yes	Mobile Number
Company	Text	No	Company Name
Address	Text	No	Address
CustomerType	Dropdown	Yes	Individual/Business

Opportunity

Field	Type	Mandatory	Description
OpportunityID	Auto Number	Yes	Opportunity Identifier
OpportunityName	Text	Yes	Opportunity Title
Contact	Lookup	Yes	Related Contact
Stage	Dropdown	Yes	Pipeline Stage
ExpectedRevenue	Currency	Yes	Revenue Value
Probability	Percentage	Yes	Win Probability
ExpectedCloseDate	Date	Yes	Close Date

Activity

Field	Type	Description
ActivityID	Auto Number	Unique Activity
ActivityType	Dropdown	Call/Meeting/Email
Subject	Text	Activity Subject
DueDate	Date	Due Date
AssignedTo	Lookup	User
Status	Dropdown	Open/In Progress/Completed

Support Ticket

Field	Type	Description
TicketID	Auto Number	Ticket Number
Customer	Lookup	Related Customer
Category	Dropdown	Issue Category
Priority	Dropdown	Low/Medium/High/Critical
Status	Dropdown	Open/In Progress/Resolved/Closed
ResolutionCode	Dropdown	Final Resolution
SLADueDateTime	Date Time (Auto)	SLA deadline calculated from Priority
SLABreached	Boolean (Auto)	True once SLADueDateTime has passed unresolved

Campaign

CampaignID (Auto, Yes); CampaignName (Text, Yes); Channel (Dropdown: Email/SMS/WhatsApp, Yes); Status (Dropdown, Yes); StartDate/EndDate (Date, Yes); Cost (Currency, No); Owner (User Lookup, Yes). Backs FR-016/017 and the Marketing Campaign Report.

Quote

QuoteID (Auto, Yes); Opportunity (Lookup, Yes); DiscountPercent (Number, No); ApprovedBy (User Lookup, conditional on BR-008); Status (Dropdown: Draft/Sent/Accepted/Rejected, Yes); ValidUntil (Date, Yes). Backs FR-011, ties directly to BR-008.

User

UserID (Auto, Yes); Name (Text, Yes); Email (Email, Yes); Role (Lookup, Yes); Status (Active/Inactive, Yes); LastLogin (DateTime, Auto). Backs FR-026, NFR-004.

Role

RoleID (Auto, Yes); RoleName (Text, Yes); Permissions (Multi-select/JSON, Yes). Backs FR-026, BR-012.

ApprovalRule / WorkflowRule

RuleID (Auto, Yes); TriggerObject (Dropdown, Yes); Condition (Text/JSON, Yes); Action (Text/JSON, Yes); Status (Active/Inactive, Yes). Backs FR-027.

AuditLog

LogID (Auto, Yes); Object (Text, Yes); RecordID (Text, Yes); Action (Create/Update/Delete, Yes); PerformedBy (User Lookup, Yes); Timestamp (DateTime, Auto); OldValue/NewValue (Text, No). Backs BR-011, NFR-005, FR-031.

10. Appendices

10.1 List of Acronyms

Acronym	Meaning
CRM	Customer Relationship Management
BRD	Business Requirements Document
FR / NFR	Functional Requirement / Non-Functional Requirement
BR	Business Rule
RACI	Responsible, Accountable, Consulted, Informed
RBAC	Role-Based Access Control
SLA	Service Level Agreement
KPI	Key Performance Indicator
ROI	Return on Investment
API	Application Programming Interface
ERP	Enterprise Resource Planning
RTO / RPO	Recovery Time Objective / Recovery Point Objective
UAT	User Acceptance Testing
AS-IS / TO-BE	Current-state / Future-state process description

10.2 Glossary of Terms

Term	Definition
Lead	An unqualified prospective customer captured before conversion to Contact/Opportunity.
Opportunity	A qualified, revenue-tracked sales pursuit linked to a Contact.
Pipeline Stage	A configurable step in the opportunity lifecycle (e.g., Prospecting -> Proposal -> Negotiation -> Closed).
360-degree Customer View	A consolidated screen showing a customer's activities, opportunities, quotes, and support history.
Lead Score	A system-calculated indicator of a lead's likelihood to convert, used for prioritization.
Cut-over	The point at which the organization switches from the legacy CRM to the enhanced system.

10.3 Related Documents

- System Architecture / Technical Design Document (to be produced post-BRD sign-off)
- Data Migration Plan (Section 11)
- UAT Test Plan and Acceptance Criteria (Section 12)
- Existing CG CRM - As-Is Process Documentation, if available
- Third-party API documentation: Email provider, WhatsApp Business API, ERP integration spec

11. Data Migration Plan

- Source: existing CG database - confirm schema access and a data dictionary mapping old to new fields.
- De-duplication pass required before migration, given BR-001 (unique Email+Mobile) and the 95% duplicate-reduction objective.
- Define a cut-over approach: big-bang vs. phased by module (Sales first, then Marketing/Support).
- Rollback plan and data validation/reconciliation sign-off criteria.

12. Acceptance Criteria & UAT Approach

- Each functional requirement shall carry explicit, testable acceptance criteria before development sign-off (e.g., FR-023: "Given a ticket with Priority = Critical, the system shall auto-assign it within 5 minutes to an available Support Executive").
- UAT sign-off owners: one per module (Sales, Marketing, Support, Admin), mapped to the Approvals table roles.
- Define entry/exit criteria and defect-severity classification for UAT.

13. Success Metrics Traceability

See Section 4.2 for the full Business Objective-to-metric mapping.
